Profile

Full Stack Web Developer specializing in building responsive and scalable web applications using React, Django, and JavaScript. Developed multiple real-world projects including AI-based tools and e-commerce systems. Strong focus on performance, user experience, and clean code practices.

Technical Skills

Frontend: HTML, CSS, JavaScript, React, Bootstrap

Backend: Python, Django, REST APIs

Database: MySQL

Tools: Git, GitHub, VS Code

Projects

ResumeVisionAI – AI Resume Analyzer

- Developed a full-stack AI-powered web application using React and Django to analyze resumes and provide actionable feedback
- Designed a responsive UI and improved user experience through structured result visualization

E-Commerce Web Application

- Built a dynamic e-commerce platform with product listing and cart functionality using React
- Implemented reusable components and responsive layouts for better scalability

Weather Application

- Created a real-time weather application using API integration to fetch and display live data
- Enabled location-based dynamic updates for improved usability

First Flight Travel Website

- Designed and developed a modern travel booking interface with responsive design principles
- Focused on intuitive navigation and user-friendly UI

JavaScript Utility Projects

- Developed multiple applications including Password Generator, QR Code Generator, Age Calculator, Quotes Generator, and Rock-Paper-Scissors Game
- Strengthened core JavaScript concepts including DOM manipulation and event handling

Areas of Interest

- Building scalable web applications
- Developing responsive user interfaces
- Backend development using Django
- Learning and implementing new technologies
